

Module-3: Navigation and Data Passing (8 Hrs)-

1. Input your details in one activity and show the input information in another activity.
2. Write a project to demonstrate image change whenever a radio button is selected. Take three such radio buttons and change the image corresponding to each radio button.
3. Program to Demonstrate Alert Dialog Box.
4. Design a sign up activity and go to the next activity on successful signing up. Show the input data in the second activity.
5. Design a login activity and go to the welcome screen on successful login. Otherwise, flash a dialogbox that sign in is incorrect, check username or password.
